

# F-Secure Anti-Virus for MIMESweeper

## F-Secure Anti-Virus for MIMESweeper

E-mail is a great and easy tool for communicating with people all around the world, but it also provides a fast and efficient way to spread harmful content, and different types of malicious code. Many end users send and receive illegal or offensive content even during their working hours, which might cause organizations to lose confidential information as well as waste bandwidth and storage space. These are just some of the reasons why many organisations feel e-mail might in addition to the huge advantages also bring some threats along.

F-Secure® Anti-Virus™ for MIMESweeper provides scalable, high-performance virus scanning and disinfection services to protect traffic passing through Clearswift MIMESweeper and Websweeper products. Clearswift's leading content security tools and the award-winning F-Secure Anti-Virus work seamlessly together and provide high level of security required by the most demanding enterprise customers. With Clearswift solutions, corporations can defend themselves against threats in e-mail traffic, such as spamming and hostile attacks. By integrating F-Secure Anti-Virus for MIMESweeper to these solutions, you get a complete, integrated solution for policy-based content security.

## Key Features

### Superior Virus Detection

By combining multiple scanning engines, F-Secure Anti-Virus for MIMESweeper offers protection as if you would have several antivirus products running at the same time.

### High Performance

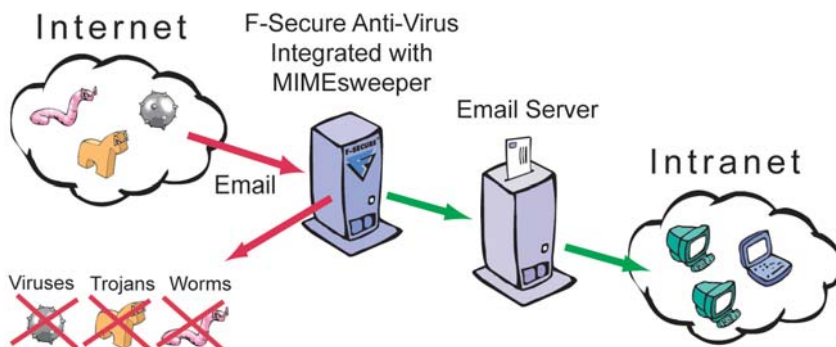

F-Secure Anti-Virus for MIMESweeper supports the latest MIMESweeper integration API's and provides superior performance and reliability.

### Ease of Administration

F-Secure Anti-Virus for MIMESweeper can be managed either in stand-alone mode or remotely using the powerful F-Secure® Policy Manager™.

### Fully Automatic Antivirus Updates

Antivirus updates are delivered automatically and transparently in the background multiple times a day with no need to stop and start the MIMESweeper services.

## Real-time, On the Fly Protection

F-Secure Anti-Virus for MIMESweeper automatically stops worms, Trojans, Web or e-mail-borne viruses, and Windows, macro and DOS file viruses. It also scans the content of compressed files, such as ZIP files.

## Seamless Integration

F-Secure Anti-Virus for MIMESweeper supports the latest Content Scanner Scenario interface in Clearswift's MAILsweeper and Websweeper products. This interface provides a direct connection between the Clearswift MIMESweeper product and F-Secure Anti-Virus. This technology ensures easy installation and the highest possible scanning performance and reliability.

## Automatic Virus Definition Updates

Updating of virus definition databases is automatic and secure. System administrators can always be sure they have the latest updates without manually having to search the web or restarting services in the products.

## 24/7 Virus Research

Antivirus products are only as good as the research and dedication behind them. The F-Secure Anti-Virus Research Team is on call 24-hours a day, responding to new and emerging threats. The research team, staffed with globally recognized virus experts, develops and distributes protection against new viruses promptly after their discovery and, in many instances, well in advance of other antivirus vendors.

## Platforms

F-Secure Anti-Virus for MIMESweeper  
Windows Server 2003/Windows  
2000 Server or Advanced Server  
Windows NT 4.0 Server or  
Advanced Server
